

2019/2020 MDTSEA Committee Assignments

I have attempted to place members in committees according to their strengths and interests. I have also taken into consideration that in order to be on two committees and be able to meet with both committees, some organization must be made for this to happen. This proposal will allow for "A" committees to meet and then "B" committees to meet without interference of committee members. I have also split the membership committee to allow them to focus on specific jobs within their committee.

Each committee is requested to provide a report at each board meeting. The report should contain:

- List of committee members
- Committee purpose and goals
- Committee activities and direction, including specific budgetary proposals

Each committee should present a report containing the committee goals, activities and direction, including specific budgetary proposals. This report should be sent electronically to the Secretary and to the President at least 48 hours prior to the meeting. A printed copy of the report should be provided for each member at the meeting by the committee.

(*) Denotes committee co-chairs; Co-chairs will fill in for each other in the event of absences. (A) or (B) denotes when committee will meet at meetings.
